

Program Implementation Resources from Family Connection Grantees (revised 12-13-2013 co)

Family Connection grantees have created materials and tools related to the implementation of their projects in one of these four program areas:

- Family Finding;
- Kinship Navigator;
- Family Group Decision-Making; or
- Residential Family Treatment.

A sampling of grant project implementation resources is posted here. More will be added as they become available.

Case Studies describe the experiences of children, youth and families whose lives have been changed through the implementation of the grant program. These may include examples of how to lay the groundwork in the community and organization in order to engage participants effectively around the value of the work.
